Speeches and Congressional Testimony 26

2/2/2006, Comptroller Dugan Praises Interagency Effort to Overhaul Privacy Notices; Supports Efforts to Develop Federal Standards to Protect Consumer Financial Data, (speech, www.occ.treas.gov/ftp/release/2006-8a.pdf)

2/3/2006, Comptroller Dugan Underscores Bank Responsibility for Model Validation, (speech, www.occ.treas.gov/ftp/release/2006-11a.pdf)

3/1/2006, OCC Chief Counsel Williams Testifies on Regulatory Relief, (testimony, www. occ.treas.gov/ftp/release/2006-25b.pdf)

3/2/2006, Comptroller Dugan Says to Hard-Pressed Gulf Communities That Regulators "Are Determined to Do Everything We Can to Be Helpful," (speech, www.occ.treas.gov/ ftp/release/2006-27a.pdf)

3/9/2006, Comptroller Dugan Speaks to Independent Community Bankers, (speech, www. occ.treas.gov/ftp/release/2006-28a.pdf)

3/13/2006, Comptroller Dugan Says Basel II Transition Should Move Forward, But With Significant Safeguards to Protect Banking System, (speech, www.occ.treas.gov/ftp/re-lease/2006-30a.pdf)

3/30/2006, OCC Chief Counsel Williams Highlights Need for Improved Consumer Financial Disclosures, (speech, www.occ.treas.gov/ftp/release/2006-40a.pdf)

## January [Interpretations and Actions]

1046, $12 / 14 / 2005$, National bank may make an equity investment in a LLC that will fund venture capital investments in small businesses.

1047, $12 / 20 / 2005$, Letter concludes that a national trust company may sponsor a closed-end investment fund that will be exempt from registration under the Investment Company Act of 1940. Letter also concludes that because the fund's underlying portfolio consists of bank eligible investments, the particular types of national banks proposed may purchase the described fund shares pursuant to 12 CFR 1.3(h)(2), subject to specific safe and sound banking practices and a 1 percent aggregate investment limitation.

1048, $12 / 21 / 2005$, National bank may extend credit to wind energy project and hold an indirect interest in real estate held by the project by acquiring an interest in the LLC that owns the project. The proposed structure facilitates the provision of financing by permitting the bank to receive federal tax credits and reducing the cost of financing.

1048a, (Written 2/27/2006, published $3 / 3 / 2006$; repeated here), Letter restates the restrictions and limitations associated with a transaction involving a wind energy project discussed in OCC Interpretive Letter No. 1048 (above).

1049, $1 / 17 / 2006$, Letter determines the appropriate credit conversion factor and risk weights to apply to a multipurpose loan commitment.

## February [Interpretations and Actions]

1050, $1 / 25 / 2006$, Applies the lending limit pilot program's special limit for loans secured by a first-lien security interest in 1- to 4-family residential real estate to two loans to the same borrower. Security interests in the same residential real estate secure the mortgage loan and the home equity loan. The letter finds that the special limit is applicable to both as the loans are secured by liens second to no other lien holder.

## March [Interpretations and Actions]

1048a, $2 / 27 / 2006$, Letter restates the restrictions and limitations associated with a transaction involving a wind energy project discussed in the January 2006 OCC Interpretive Letter No. 1048 (above).

1051, $2 / 15 / 2006$, Letter provides confirmation that national bank may purchase and hold below-investment-grade debt in connection with a comprehensive program to hedge the counterparty credit risk exposure that arises from its derivatives activities. The letter concludes that the bank may engage in the transactions it proposes, when the bank's examiner-in-charge is satisfied that the bank has adequate risk management and measurement systems and controls and does not object to the activity.

1052, $11 / 30 / 2005$, Letter applies lending limit combination rules to three credit programs contemplated by a national bank, in which the bank would make loans, or make or buy leases, to independent contractors. The letter finds that each of the programs results in loan combinations under the lending limit. In addition, the second program involves partial attribution of leases to the seller under the lending limit's third-party paper rule.

1053, $1 / 31 / 2006$, Letter discusses OCC Interpretive Letters No. 1044, 1045, and 1048. Bank premises facilities must be established in good faith in furtherance of bank's business operations, and burden is on bank to demonstrate a legitimate business reason based on accommodating its banking business.

1054, 7/27/2005, Letter reviews OCC interpretive letters and federal case law that makes clear that state statutes that prohibit on-us check cashing fees do not apply to national bank.

1055, $8 / 2 / 2005$, Letter reviews OCC interpretive letters and federal case law that makes clear that state statutes that prohibit on-us check cashing fees do not apply to national bank.

| Chief Information Officer | Jackquelyn E. Fletcher |
| Senior Deputy Comptroller for International and Economic Affairs__ | Jeffrey A. Brown |
| Senior Deputy Comptroller for Management and Chief Financial Officer__ | Thomas R. Bloom |
| Ombudsman | Samuel P. Golden |
| Executive Officer for Leadership, Learning, and Workplace Fairness__ | Mark A. Nishan |

## Background

The Office of the Comptroller of the Currency (OCC) was established in 1863 as a bureau of the Department of the Treasury. The OCC is headed by the Comptroller, who is appointed by the President, with the advice and consent of the Senate, for a five-year term.

The OCC regulates national banks by its power to:

- Examine the banks;
- Approve or deny applications for new charters, branches, capital, or other changes in corporate or banking structure;
- Take supervisory actions against banks that do not conform to laws and regulations or that otherwise engage in unsound banking practices, including removal of officers, negotiation of agreements to change existing banking practices, and issuance of cease and desist orders; and
- Issue rules and regulations concerning banking practices and governing bank lending and investment practices and corporate structure.

The OCC divides the United States into four geographical districts, with each headed by a deputy comptroller.

The OCC is funded through assessments on the assets of national banks, and federal branches and agencies. Under the International Banking Act of 1978, the OCC regulates federal branches and agencies of foreign banks in the United States.

## The Comptroller

John C. Dugan was sworn in as the 29th Comptroller of the Currency on August 4, 2005. Prior to his appointment as Comptroller, Mr. Dugan was a partner at the law firm of Covington \& Burling, where he chaired the firm's Financial Institutions Group. He specialized in banking and financial institution regulation. He also served as outside counsel to the ABA Securities Association. He served at the Department of the Treasury from 1989 to 1993 and was appointed assistant secretary for domestic finance in 1992. While at Treasury, Mr. Dugan had extensive responsibility for policy initiatives involving banks and financial institutions, including the savings and loan cleanup, Glass-Steagall and banking reform, and regulation of governmentsponsored enterprises. In 1991, he oversaw a comprehensive study of the banking industry that formed the basis for the financial modernization legislation proposed by the administration of the first President Bush. From 1985 to 1989, Mr. Dugan was minority counsel and minority general counsel for the U.S. Senate Committee on Banking, Housing, and Urban Affairs. There he advised the committee as it debated the Competitive Equality Banking Act of 1987, the Proxmire Financial Modernization Act of 1988, and the Financial Institutions Reform, Recovery, and Enforcement Act of 1989.

Among his professional and volunteer activities before becoming Comptroller, he served as a director of Minbanc, a charitable organization whose mission is to enhance professional and educational opportunities for minorities in the banking industry. He was also a member of the American Bar Association's committee on banking law, the Federal Bar Association's section of financial institutions and the economy, and the District of Columbia Bar Association's section of corporations, finance, and securities laws. A graduate of the University of Michigan in 1977 with an A.B. in English literature, Mr. Dugan also earned his J.D. from Harvard Law School in 1981.

The Quarterly Journal is the journal of record for significant actions and policies of the OCC. It is published four times a year, based on data released in March, June, September, and December. The Quarterly Journal is first released on the Web at www.occ.treas.gov/qj/qj.htm, and then, by subscription, on the CD-ROM Quarterly Journal Library, a cumulative collection starting with volume 17. The Quarterly Journal includes the condition and performance of commercial banks, statistical tables on the performance of FDIC-insured banks and OCC data on bank corporate structure, policy statements, decisions on banking structure, appeals to the ombudsman, links to selected speeches and congressional testimony and interpretive letters, summaries of enforcement actions, and other information of interest in the administration of national banks. Please send your comments and suggestions to Rebecca Miller, senior writer-editor, by fax to (202) $874-5263$ or by e-mail to quarterlyjournal@occ.treas.gov. Subscriptions to the Quarterly Journal Library CD-ROM are available for $\$ 50$ a year by writing to Publications-QJ, OCC, Attn: Accounts Receivable, MS 4-8, 250 E St., SW, Washington, DC 20219 (print order form).

## Quarterly Journal Library CD-ROM ordering

The Quarterly Journal is available by subscription on CD-ROM, as the Quarterly Journal Library, and continues to be available on the Internet at www.occ.treas.gov/qj/qj.htm. The CD-ROM subscription price is $\$ 50$ for four quarterly issues. An individual CD is $\$ 15$. Each issue of the Quarterly Journal Library CD-ROM will include Volume 17 (1998) through the current quarterly issue.

Quarterly Journal Library for Vols. 17 through current issue, in 4 CDs, issued quarterly:
Single copy of the Quarterly Journal Library (CD-ROM):
$\$ 50.00$ per year
$\$ 15.00$ each
TO ORDER, PREPAYMENT IS REQUESTED. Please complete the form below and send it with a check, payable to the Comptroller of the Currency, to:

Please make your check payable to the Comptroller of the Currency. Payments by check will be converted into an electronic fund transfer. Please read the following notice on the reverse of this page (also at http://www.occ.treas.gov/ NoticePaymentbyCheck.htm) if you are paying by check.

For advice or information about availability, or for an urgent need for a publication, please call OCC Publications Control at (202) 874-4960.

Thank you for your interest in the Quarterly Journal. We welcome your comments on how to make this publication more informative for you. We are particularly interested in your comments on the usefulness of the information and its presentation. Please send your comments to Rebecca Miller, Senior Writer-Editor, OCC Publishing Services, by fax at (202) $874-5263$ or by e-mail at quarterlyjournal@occ.treas.gov.

## Notice to Customers Making Payment by Check

Authorization to convert your check: If you present a check to make your payment, your check will be converted into an electronic fund transfer. "Electronic fund transfer" is the term used to refer to the process in which a business or government agency electronically instructs your financial institution to transfer funds from your account to its account, rather than processing your paper check. By presenting your signed check to the OCC, you authorize the agency to copy the check and to use the account information from the check to make an electronic fund transfer from your account for the same amount as the check. If the electronic fund transfer cannot be processed for technical reasons, you authorize the OCC to process the copy of your check.

Insufficient funds: The electronic fund transfer from your account will usually occur within 24 hours, which is faster than a check is normally processed. Therefore, make sure sufficient funds are available in your checking account when you send your check to the OCC. If the electronic fund transfer cannot be completed because of insufficient funds, the OCC may attempt the transfer two additional times.

Transaction information: The electronic fund transfer from your account will be on the account statement you receive from your financial institution. However, the transfer may be in a different place on your statement than the place where your check entries normally appear. For example, it may appear under "other withdrawals" or "other transactions." You will not receive your original check back from your financial institution. For security reasons, the OCC will destroy your original check, but it will keep a copy of the check for record keeping.

Your rights: You should contact your financial institution immediately if you believe that the electronic fund transfer reported on your account statement was not properly authorized or is otherwise incorrect. Consumers have protections under a federal law called the Electronic Fund Transfer Act for an unauthorized or incorrect electronic fund transfer.

## Condition and Performance of Commercial Banks

Earnings remained high at national banks in the first quarter of 2006, as they posted a near-record 16.3 percent return on equity, adjusted for the effects of recent mergers (unadjusted return on equity (ROE) was 13.8 percent). Noninterest income was the most significant contributor to earnings growth, as Table 1 indicates, with gains at a few of the largest banks driving the results. Net interest income grew more slowly, the result of a continued slide in net interest margin at large banks.

Table 1-Solid earnings gains at largest banks driven by noninterest income growth
National banks

Source: Integrated Banking Information System (OCC)
Data are merger adjusted and held constant for banks operating as of March 31, 2006. The largest five national banks are JPM Chase, Citi, BofA, Wachovia, and Wells.

As in the second half of 2005, gains in noninterest income came in part from a sharp rise in trading income at a few large banks Trading income tends to be volatile, and so this increase may not be sustained.

For national banks as a whole, provisioning expenses were almost unchanged from a year ago. In contrast, between the end of 2002 and mid 2005, as the economy was strengthening, banks responded to improvements in credit quality by reducing the amounts they set aside for future loan losses, boosting net income growth.

A different picture of income growth emerges if results from the five largest banks are excluded. In this case, as Table 1 shows, net income for the quarter grew only 3.4 percent, rather than 9.1 percent. Further, excluding the five largest banks, net interest income leads the gains, with noninterest income trailing; if the largest five are included, noninterest income leads, and net interest income trails. Excluding the five largest banks, provisioning expenses rose nearly 9 percent year-over-year, compared to less than 1 percent if the five largest banks are included.

Net interest income continues to grow on the strength of very strong loan growth. Figure 1 shows that for the entire commercial banking system, loan growth has averaged 9 percent for seven consecutive quarters, the longest period of such sustained growth in more than 20 years. Over the last seven quarters, loan growth has been more than enough to offset the slide in net interest margins (NIMs). For banks with assets over $\$ 1$ billion, aggregate NIM stood at 2.8 percent in the first quarter, down 20 basis points in the last two years, and 70 basis points in the last 10 years. For banks with less than $\$ 1$ billion in assets, aggregate NIM stood at 3.9 percent in the first quarter, down 13 basis points in two years, and 40 basis points in 10 years.

At small and midsized banks, loan growth has been particularly strong in commercial real estate (CRE). As a result, many of these banks are now very exposed to the CRE sector. Figure 2 shows CRE loans as a share of total loans for several classes of banks. Between 1988 and 2006, the CRE share of the total loan portfolio grew from 20 percent to 42 percent for community banks, and from 21 percent to 37 percent for midsize banks. For community banks, the construction share rose particularly fast, from 4 percent to 13 percent of total loans over the period. But at large banks, both total CRE loans and construction loans declined slightly as a share of the total over that time.

Figure 1-Very strong loan growth sustains net interest income as margins remain weak

Source: Integrated Banking Information System (OCC)
Growth calculated from the year-ago quarter.
An additional factor contributing to growth in the share of CRE and construction loans was weakness in commercial and industrial (C\&I) lending. C\&I loans as a share of the total fell steadily from 1984 to 2004; from 2000 to 2003, C\&I lending fell even in absolute dollars. Although the growth rate of C\&I loans is now positive for the system as a whole, the total C\&I loan book remains well below pre-recession levels.

Figure 2-CRE concentration growing fast at community and midsize banks

Source: Integrated Banking Information System (OCC)
1988 banks defined using asset size groups (under $\$ 1$ billion, $\$ 1-\$ 10$ billion, and over $\$ 10$ billion). Commercial real estate includes nonresidential, multifamily, and construction loans.

The 500 or so banks reporting total CRE loans over 300 percent of risk-based capital are spread all over the country, including 45 of the 50 states. In each of the four OCC districts, at least 23 percent of banks report CRE loans totaling over 300 percent of riskbased capital, with a high of 33 percent reported in the Western District. CRE-focused banks earn a higher ROE, on average, but balancing this higher return is higher risk: they have higher loan-to-asset ratios, and tend to rely more on volatile liabilities than other banks. Moreover, small banks' lack of geographic diversity increases the risk in their CRE portfolios.

In the past, sharp downturns in CRE markets have caused serious problems for banks. For community banks in the Northeast, for example, charge-offs on nonresidential commercial loans reached 2 percent during the CRE slump of the early 1990s, more than 10 times the long-term average for all community banks. For the same group, charge-offs on construction loans reached 7 percent, more than 40 times the long-term average for all community banks.

Figure 3-For commercial real estate, rental income gains may not be enough to offset impact of higher interest rates

Source: Property \& Portfolio Research; assumes 20 yr. amort., 5.5\% initial interest rate; dotted line shows average of expected rent increase for four major property types.
DSCR: debt service coverage ratio
CRE: commercial real estate
The CRE sector also deteriorated during the 2001 recession. Vacancy rates, rents, and net operating income all suffered during the downturn and its aftermath. But falling interest rates cushioned the initial impact (most CRE loans are made at variable rates), and the persistence of low rates allowed owners of CRE properties to remain solvent, and repay their loans on time.

Now higher rates threaten this favorable picture. To offset the expected increase in interest expense, rental income must rise as well. Projections of expected growth in CRE rental income over the next two years show a range of 5 percent for apartments to 9 percent for offices. But assuming a debt service coverage ratio (DSCR) of 1.2, and 20year amortization (see Figure 3), this would offset only about a 100 basis point rise in interest rates from 2005 levels-an increase that has already occurred. This leaves little headroom for borrowers to absorb future interest rate increases, at least for some CRE borrowers in some regions.

## Glossary

## Data Sources

Data are from the Federal Financial Institutions Examination Council (FFIEC) Reports of Condition and Income (call reports) submitted by all FDIC-insured, national-chartered and state-chartered commercial banks and trust companies in the United States and its territories. Uninsured banks, savings banks, savings associations, and U.S. branches and agencies of foreign banks are excluded from these tables. All data are collected and presented based on the location of each reporting institution's main office. Reported data may include assets and liabilities located outside of the reporting institution's home state.

The data are stored on and retrieved from the OCC's Integrated Banking Information System (IBIS), which is obtained from the FDIC's Research Information System (RIS) database.

## Computation Methodology

For performance ratios constructed by dividing an income statement (flow) item by a balance sheet (stock) item, the income item for the period was annualized (multiplied by the number of periods in a year) and divided by the average balance sheet item for the period (beginning-ofperiod amount plus end-of-period amount plus any interim periods, divided by the total number of periods). For "pooling-of-interest" mergers, prior period(s) balance sheet items of "acquired" institution(s) are included in balance sheet averages because the year-to-date income reported by the "acquirer" includes the year-to-date results of "acquired" institutions. No adjustments are made for "purchase accounting" mergers because the year-to-date income reported by the "acquirer" does not include the prior-to-merger results of "acquired" institutions.

## Definitions

Commercial real estate loans-loans secured by nonfarm nonresidential properties.
Construction real estate loans-includes loans for all property types under construction, as well as loans for land acquisition and development.

Core deposits-the sum of transaction deposits plus savings deposits plus small time deposits (under \$100,000).

IBIS-the OCC's Integrated Banking Information System.
Leverage ratio-Tier 1 capital divided by adjusted tangible total assets.
Loans to individuals-includes outstanding credit card balances and other secured and unsecured installment loans.

Net charge-offs to loan and lease reserve-total loans and leases charged off (removed from balance sheet because of uncollectibility), less amounts recovered on loans and leases previously charged off.

Net loans and leases to assets-total loans and leases net of the reserve for losses.
Net operating income-income excluding discretionary transactions such as gains (or losses) on the sale of investment securities and extraordinary items. Income taxes subtracted from operating income have been adjusted to exclude the portion applicable to securities gains (or losses).

Net operating revenue-the sum of net interest income plus noninterest income.
Noncurrent loans and leases-the sum of loans and leases 90 days or more past due plus loans and leases in nonaccrual status.

Nonperforming assets-the sum of noncurrent loans and leases plus noncurrent debt securities and other assets plus other real estate owned.

Number of institutions reporting-the number of institutions that actually filed a financial report.

Off-balance-sheet derivatives-the notional value of futures and forwards, swaps, and options contracts; beginning March 31, 1995, new reporting detail permits the exclusion of spot foreign exchange contracts. For March 31, 1984 through December 31, 1985, only foreign exchange futures and forwards contracts were reported; beginning March 31, 1986, interest rate swaps contracts were reported; beginning March 31, 1990, banks began to report interest rate and other futures and forwards contracts, foreign exchange and other swaps contracts, and all types of option contracts.

Other real estate owned-primarily foreclosed property. Direct and indirect investments in real estate ventures are excluded. The amount is reflected net of valuation allowances.

Percent of institutions unprofitable-the percent of institutions with negative net income for the respective period.

Percent of institutions with earnings gains-the percent of institutions that increased their net income (or decreased their losses) compared to the same period a year earlier.

Reserve for losses-the sum of the allowance for loan and lease losses plus the allocated transfer risk reserve.

Residential mortgage assets-the sum of 1- to 4-family residential mortgages plus mortgagebacked securities.

Return on assets (ROA)—net income (including gains or losses on securities and extraordinary items) as a percentage of average total assets.

Return on equity (ROE)—net income (including gains or losses on securities and extraordinary items) as a percentage of average total equity capital.

Risk-based capital ratio-total capital divided by risk-weighted assets.
Risk-weighted assets-assets adjusted for risk-based capital definitions which include on-bal-ance-sheet as well as off-balance-sheet items multiplied by risk weights that range from zero to 100 percent.

Securities-excludes securities held in trading accounts. Effective March 31, 1994 with the full implementation of Financial Accounting Standard (FAS) 115, securities classified by banks as "held-to-maturity" are reported at their amortized cost, and securities classified a "available-forsale" are reported at their current fair (market) values.

Securities gains (losses)—net pre-tax realized gains (losses) on held-to-maturity and available-for-sale securities.

Total capital-the sum of Tier 1 and Tier 2 capital. Tier 1 capital consists of common equity capital plus noncumulative perpetual preferred stock plus minority interest in consolidated subsidiaries less goodwill and other ineligible intangible assets. Tier 2 capital consists of subordinated debt plus intermediate-term preferred stock plus cumulative long-term preferred stock plus a portion of a bank's allowance for loan and lease losses. The amount of eligible intangibles (including mortgage servicing rights) included in Tier 1 capital and the amount of the allowance included in Tier 2 capital are limited in accordance with supervisory capital regulations.

Volatile liabilities-the sum of large-denomination time deposits plus foreign-office deposits plus federal funds purchased plus securities sold under agreements to repurchase plus other borrowings. Beginning March 31, 1994, new reporting detail permits the exclusion of other borrowed money with original maturity of more than one year; previously, all other borrowed money was included. Also beginning March 31, 1994, the newly reported "trading liabilities less revaluation losses on assets held in trading accounts" is included.

## Recent Licensing Decisions

## Cases Published during January, February, and March 2006

## Community Reinvestment Act (CRA) Decision

On December 22, 2005, the OCC approved the application to merge Hudson United Bank, Mahwah, New Jersey, (Hudson) into TD Banknorth, National Association, Portland, Maine, under the charter and title of the latter. The OCC received comments from two community organizations opposing the merger because of concerns that TD Banknorth has not reinvested in lower income and minority communities, possessed no experience in the urban inner city, has not developed working relationships with community-based organizations, has a low level of lending to minorities and higher denials rates compared to whites, and may potentially close branches in lower-income communities resulting from the merger. After considering TD Banknorth's response to the commenters and its latest CRA performance evaluation issued by the OCC with an "outstanding" rating as well as other findings, the OCC determined that the applicants' records of CRA performance are consistent with approval of the proposed transaction. The OCC also determined not to conduct a public hearing requested by one commenter because the commenter did not indicate why written submissions would be insufficient to make an adequate presentation of issues or facts to the OCC. [CRA Decision No. 131]

## Federal Branch

On January 3, 2006, the OCC granted preliminary conditional approval for La Caisse centrale Desjardins du Québec (CCD) to establish a limited federal branch with the title Caisse centrale Desjardins U.S. Branch to be located in Hallandale, Florida. This conditional approval was subject to standard conditions imposed on initial federal branch applications. These conditions are enforceable under 12 CFR 1818. Federal branch applications are infrequent. [Conditional Approval No. 727]

## Operating Subsidiary

On February 16, 2006, the OCC conditionally approved the application filed by CornerBank, N.A., Winfield, Kansas to establish a wholly owned operating subsidiary to provide Internet access to its customers and nonbank customers as part of its package of Internet banking services. The bank will acquire all the assets and liabilities of BroadBand Kansas, Inc., Winfield, Kansas (BroadBand), a Kansas corporation and a high-speed Internet service provider (ISP), including its related contract with Cox Communications. In addition, the bank will purchase certain assets, customer accounts, and contract rights of Key Creations, Inc., Udall, Kansas (Key), a Kansas corporation. Key, a dial-up ISP, provides services to the bank's existing customers and also to some nonbank customers. The name of the newly established operating subsidiary is Right Angle Internet and Networking, Inc. This conditional approval was subject to the condition that the bank may offer ISP services to the existing nonbank customers of Key and BroadBand for a two-year period from the date of acquisition, but may not sell ISP services to new nonbank customers unless it provides information satisfactory to demonstrate compliance with 12 CFR 7.5004 and obtains the OCC's prior approval. [Conditional Approval No. 733]

## Appeals Process

## Appeal of Community Reinvestment Act (CRA) Performance Evaluation Rating

## Background

The board appealed the OCC supervisory office's decision to assign a CRA performance rating of "needs to improve." The board disagreed with this rating because they believed they were penalized for their strategy to seek lending activities outside of their assessment area (AA). Management believed that this endeavor improved their ability to lend within their market by offering fixed-rate loans. However, this practice resulted in a majority of the current lending activities taking place outside of their delineated AA, an area more narrowly focused than their generally targeted market. The OCC supervisory office stated that the "needs to improve" rating was based on poor lending levels within the bank's delineated AA. They also stated that, while the bank had the capacity and opportunity to help meet the residential and business credit needs in their AA, management directed lending activities to a market 60 miles away.

## Discussion

The ombudsman conducted a review of the information submitted by the bank and support documentation from the supervisory office. The review included meetings with the bank's senior management team as well as with members of the supervisory office.

The OCC concluded that the CRA rating was based on poor lending levels within the bank's AA. Although there were opportunities to help meet credit needs in the bank's AA, management's decision to pursue a lending strategy to purchase brokered, fixed-rate loans resulted in a very low level of lending within the AA. The number and dollar amounts of reportable Home Mortgage Disclosure Act loans and commercial loans originated in the AA were 29 percent and 36 percent, respectively, for the evaluation period. Management entered into the mortgage broker relationship to improve profitability by expanding its servicing portfolio (servicing loans sold in the secondary market) and also to retain some of the mortgages to replace existing mortgages refinanced elsewhere.

## Conclusion

The ombudsman gave consideration to the cumulative factors listed in the CRA performance evaluation, the performance context, and management's supporting documentation, including their acknowledgement of additional lending opportunities existing within the AA. As a result of his review, the ombudsman opined that the rating assigned by the supervisory office at the time of the examination was appropriate.

## InTERPRETATIONS

## January [Interpretations and Actions]

1046, 12/14/2005, National bank may make an equity investment in a LLC that will fund venture capital investments in small businesses.

1047, $12 / 20 / 2005$, Letter concludes that a national trust company may sponsor a closed-end investment fund that will be exempt from registration under the Investment Company Act of 1940. Letter also concludes that because the fund's underlying portfolio consists of bank eligible investments, the particular types of national banks proposed may purchase the described fund shares pursuant to 12 CFR $1.3(\mathrm{~h})(2)$, subject to specific safe and sound banking practices and a 1 percent aggregate investment limitation.

1048, $12 / 21 / 2005$, National bank may extend credit to wind energy project and hold an indirect interest in real estate held by the project by acquiring an interest in the LLC that owns the project. The proposed structure facilitates the provision of financing by permitting the bank to receive federal tax credits and reducing the cost of financing.

1048a, (Written 2/27/2006, published 3/3/2006; repeated here), Letter restates the restrictions and limitations associated with a transaction involving a wind energy project discussed in OCC Interpretive Letter No. 1048 (above).

1049, $1 / 17 / 2006$, Letter determines the appropriate credit conversion factor and risk weights to apply to a multipurpose loan commitment.

## February [Interpretations and Actions]

1050, $1 / 25 / 2006$, Applies the lending limit pilot program's special limit for loans secured by a first-lien security interest in 1- to 4-family residential real estate to two loans to the same borrower. Security interests in the same residential real estate secure the mortgage loan and the home equity loan. The letter finds that the special limit is applicable to both as the loans are secured by liens second to no other lien holder.

## March [Interpretations and Actions]

1048a, $2 / 27 / 2006$, Letter restates the restrictions and limitations associated with a transaction involving a wind energy project discussed in the January 2006 OCC Interpretive Letter No. 1048 (above).

1051, $2 / 15 / 2006$, Letter provides confirmation that national bank may purchase and hold below-investment-grade debt in connection with a comprehensive program to hedge the counterparty credit risk exposure that arises from its derivatives activities. The letter concludes that the bank may engage in the transactions it proposes, when the bank's examiner-in-charge is satisfied that the bank has adequate risk management and measurement systems and controls and does not object to the activity.

1052, $11 / 30 / 2005$, Letter applies lending limit combination rules to three credit programs contemplated by a national bank, in which the bank would make loans, or make or buy leases, to independent contractors. The letter finds that each of the programs results in loan combinations under the lending limit. In addition, the second program involves partial attribution of leases to the seller under the lending limit's third-party paper rule.

1053, $1 / 31 / 2006$, Letter discusses OCC Interpretive Letters No. 1044, 1045, and 1048. Bank premises facilities must be established in good faith in furtherance of bank's business operations, and burden is on bank to demonstrate a legitimate business reason based on accommodating its banking business.

1054, 7/27/2005, Letter reviews OCC interpretive letters and federal case law that makes clear that state statutes that prohibit on-us check cashing fees do not apply to national bank.

1055, $8 / 2 / 2005$, Letter reviews OCC interpretive letters and federal case law that makes clear that state statutes that prohibit on-us check cashing fees do not apply to national bank.

## Mergers-Jandary i to March 3 I, 2006
