This is a quarterly publication of the Office of Thrift Supervision, Economic Analysis Division, Washington, D.C.

For future reference, the tables for the **quarter ending December 31, 2003** will be available for retrieval after **January 31, 2004**. The tables are available on the OTS Home page at <http://www.ots.treas.gov/> in the statistical releases section.

Selected Asset and Liability Price Tables

Selected Asset and Liability Price Tables contain "price tables" listing the estimated economic values of selected assets, liabilities, and off-balance sheet instruments in various interest rate scenarios. The economic values are estimated by the OTS Net Portfolio Value Model.

In addition to the price tables, the publication includes the following data (see the *OTS Net Portfolio Value Model* manual for more information on how the data is used by the NPV Model):

- The quarter-end Treasury zero-coupon curve used by the NPV Model to create discount factors for assets, and yield curves for interest rate swaps and wholesale CDs.
- Quarter-end interest rates that are used by the Model to calculate discount factors for a variety of assets.
- Four tables listing estimated prepayments for the following types of single-family mortgages: 30-Year conventional FRMs, 30-year FHA/VA FRMs, 15-year FRMs, and 7-year balloon mortgages.
- One-month implied forward rates for the following interest rate series: Treasury, LIBOR, secondary market CDs, and retail CD rates.
- Price indications for a set of benchmark fixed-rate and adjustable rate mortgage securities. The price indications are intended to represent reasonable approximations of the quarter-end market price of the securities.
- **Based on the current interest rate environment, the values represented by –300bp and –200bp will not apply to portions of the NPV model this quarter.**
- **As of March 2002, mortgage derivative securities are no longer priced by the NPV model, and therefore do not appear in these price tables.**
